

DO VAN TUNG

FULLSTACK DEVELOPER

Ho Chi Minh City, Vietnam • +84 379 399 512 • dovantung1000@gmail.com

Portfolio: <https://portfolio-irid-pi-75.vercel.app/> • GitHub: <https://github.com/vantungdz> • LinkedIn: <https://www.linkedin.com/in/vantung1806/>

PROFESSIONAL SUMMARY

Fullstack Developer with 5+ years of professional experience building production web applications and enterprise systems. Strong frontend foundation across React, Next.js, Vue.js, and Angular, with hands-on backend development using Next.js and Node.js. Experienced in end-to-end ownership, complex business workflows, RBAC, API integration, and AI/LLM-oriented backend solutions. Contributed to long-running production systems for Japanese clients and independently built an internal KPI platform from frontend through backend and business logic.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3

Frontend: React.js, Next.js, Vue.js, Angular, React Native, Tailwind CSS

Backend: Node.js, Express.js, Next.js, REST APIs, JWT

AI / LLM: vLLM, OpenClaw, Function Calling, MongoDB integration

State Management: Redux, Redux-Saga, Vuex, Context API

Databases: PostgreSQL, Supabase, MongoDB, MySQL

Security: JWT, bcrypt, RBAC, Row Level Security (RLS)

Testing & Quality: Jest, ESLint, Prettier

DevOps & Tools: Docker, Git, SVN, Jira, CI/CD

Other: System Design, Performance Optimization, Webhooks, Payment Integration

PROFESSIONAL EXPERIENCE

Middle Developer — ISB Vietnam

Ho Chi Minh City, Vietnam | Jul 2022 – Present

Japanese Client Projects

Banking System — Enterprise / Financial System

- Engineered frontend components for sensitive financial workflows using **React and TypeScript**, with a focus on reliability and maintainability.
- Translated detailed Japanese business requirements into production-ready interfaces and transaction-oriented user flows.
- Worked across feature implementation, API integration, testing, debugging, and production maintenance in a long-running banking product.
- Contributed to a production system actively used in Japan for **3+ years**.

Hotel Management System — Client Project / Japan

- Shaped frontend interfaces in **Angular** for booking and hotel-management workflows, turning detailed business specifications into usable screens.
- Built and refined UI behavior for multi-step operational workflows while coordinating API integration with the Japan-based backend team.
- Investigated UI issues, validated business scenarios, and supported testing and production maintenance throughout the project lifecycle.
- Contributed to a system in production for **1.5+ years** with a **4/5 customer rating**.

School Management System — Client Project / Japan

- Delivered frontend features with **Vue.js** for a production school-management platform serving Japanese business requirements.
- Structured reusable UI patterns and implemented business-facing screens from specifications through testing and refinement.
- Collaborated with the development team on API integration, defect investigation, release support, and ongoing maintenance.
- Contributed to a system in production for **1.5+ years** with a **4/5 customer rating**.

Internal Projects

KPI Management System — Fullstack / End-to-End Ownership

- Independently designed and developed an internal KPI management system end-to-end using **Next.js and PostgreSQL**.
- Modeled complex KPI creation, assignment, approval, cascading, and performance-tracking workflows across the application.
- Implemented **RBAC across 4 user roles** to enforce business permissions and data access.
- Developed dashboards, real-time updates, and Excel-based reporting capabilities for KPI monitoring and management.
- Developed against PostgreSQL before integration with the company's internal database environment.

AI / vLLM Integration — Internal Project

- Developed the **Node.js** backend/integration layer as part of a **4-member team** building an AI solution for customer demonstrations and business development.
- Integrated application workflows with **vLLM** and used **function calling** to connect LLM-driven requests with backend tools and business data.
- Worked with **MongoDB** and **OpenClaw** as part of the application integration, supporting AI-assisted data interaction and tool execution.
- Prepared the solution for demonstrations to potential Japanese clients and contributed to exploring follow-on project opportunities.

Frontend Engineer — BUSO

Ho Chi Minh City, Vietnam | Oct 2020 – Dec 2021

- Developed production frontend features for an enterprise management platform covering company administration and recruitment/interview workflows.
- Turned business requirements into reusable interfaces and supported feature delivery from implementation through testing and maintenance.
- Collaborated with the development team to investigate issues, refine workflows, and maintain the production application.

SELECTED PERSONAL PROJECT

Bakery E-commerce & Management System — Personal Project

Jan 2022 – Jun 2022

- Independently designed and developed a full-stack e-commerce and management platform while between full-time roles.
- Built customer-facing and administrative experiences using **Next.js, React, and TypeScript**, covering multi-role business workflows.
- Developed backend services with **Node.js and Express** for products, orders, customers, vouchers, reviews, loyalty points, blog content, and store settings.
- Designed a **PostgreSQL/Supabase** data layer with authentication and role-based access control.
- Implemented custom cake ordering, image uploads, transactional email notifications, and payment verification using **VietQR and SePay webhooks**.

Technologies: Next.js, React, TypeScript, Tailwind CSS, Node.js, Express, PostgreSQL, Supabase, JWT, bcrypt, VietQR, SePay, Nodemailer

EDUCATION

Bachelor of Computer Science

VNUHCM – University of Science | Graduated: August 2020
